

Xmitter

Single Stack led Light bar

Original Light Bar With Seamless Beam

The original LED bar, the Xmitter is rugged and powerful for racers and race enthusiasts alike. Featuring a patented mounting system found throughout the Xmitter Family, a seamless beam pattern and low power consumption, it is easy to see why the Xmitter is chosen by US Homeland Security, Off Road Racers and NASA.

3 WATT LED

The Xmitter utilizes 3 Watt LED driven at 80% efficiency for high output. 3 Watt LEDs produce 180 raw lumens per LED.

TIGHT LED CONFIGURATION

A tight LED footprint allows more optical control to achieve more precise beam patterns and further distances.

TRUSTED EVERYWHERE

NASA, US Border Patrol and United Launch Alliance have in common that they trust the Vision X Xmitter Bar.

COLOR LED AND INFRARED LED

The Xmitter can be configured with amber, red, blue, green and infrared LEDs upon special order.
