- Patent Pending

## Cannon Series Usage Guide

**IRIS REFLECTOR ACHIEVES 1115'**  
 The proprietary IRIS Reflector is the first of its kind in the LED market. With IRIS technology, a single 40 Watt LED is able to achieve unmatched distance and intensity with over 1115 feet of usable light.

## Technical Information

| PART#           | Beam Pattern | Raw Lumens   | Dimensions       | Weight        | Wattage      |
|-----------------|--------------|--------------|------------------|---------------|--------------|
| CTL-CPZ110XP    | 10° Narrow   | 3,000 lm(ea) | 120/110.7/146 mm | 0.920 kg      | 40 Watt      |
| CTL-CPZ110XPKIT | 10° Narrow   | 3,000 lm(x2) | 120/110.7/146 mm | 0.920 kg (x2) | 40 Watt (x2) |

## Available Cover Colors

- Clear Covers - PCV-CP1**  
 The clear polycarbonate cover provides protection the elements while out on the trail or on the dune. Clear covers are also available in euro and flood configurations.
- Blue Covers - PCV-CP1B**  
 The blue polycarbonate cover optimizes the Cann driving on snow. Blue covers are also available in and flood configurations.
- Yellow Covers - PCV-CP1Y**  
 The yellow polycarbonate cover optimizes the Can for driving in heavy fog by removing the blue light to reduce glare back at the driver. Yellow covers are available in euro and flood configurations.
- Red Covers - PCV-CP1R**  
 The red polycarbonate cover optimizes the Cann driving in heavy dust by penetrating particulate in air. Red covers are also available in euro and flood configurations.
- Black Covers - PCV-CP1BL**  
 The black out covers allow for street legal application and operate as a safety indicator by glowing in the

## Available Cover Beams

- Protective Cover - PCV-CP1**  
 Transparent polycarbonate covers provide increased protection for Light Cannon from harsh conditions.
- Euro Cover - PCV-CP1EU**  
 The flat horizontal beam is designed to provide peripheral and forward lighting while staying out

eyes of oncoming traffic.

*Trail Flood Cover - PCV-CP1FL*

The Trail Flood beam pattern is designed to illuminate from the bottom of the ditch to the tree tops while riding. This low speed flood lights upcoming trail hazards.
