

## Xmitter Prime Race Halo

Race Series Halo For Ultimate Distance Output

### IRIS reflector technology

The XPR-H Series Light Bar uses a high intensity LED that allows the beam to take full advantage of the Iris Reflector and project the light up to 75% further than the XPR series. Designed to outshine and outlast the competition.

The 10-watt LEDs in these light bars are paired with IRIS reflector technology to project usable light further than ever before possible. IRIS reflector technology was first introduced with the Optimus Series in 2012, using deeply recessed reflectors to achieve unmatched distance in a light of that size.

The XPR-H light bars create an unmatched distance option in LED Light Bars. The 27 LED light bar produces 3,773ft of usable light. Another new innovation in these light bars is the use of tilting reflectors, allowing the outer 3 LEDs on each end of the light bars (sizes above 6 LED) to tilt out to create a mixed or combo beam pattern. Increasing the spread of the light, tilting reflectors creates even more visibility for the driver.

The XPR-H series offers several mounting options, Vision X's patented feet mounts, new end mount brackets, or pair the patented feet mounts with Vision X's billet tube mounts (available as an accessory) to mount to roll cages or any tube framing. New end mounts securely fasten to the housing with two bolts and lock washers per end, and allow for vertical adjustment once mounted.

### END MOUNT

## Xmitter Prime Race Halo

- ▶ PWM Integrated Dimming Circuitry
- ▶ Proprietary IRIS Reflector Technology Featuring Reflectors
- ▶ Full Range Fills In Road Way
- ▶ Xtreme Five Watt LED is Driven to 90% Efficiency
- ▶ Integrated Electronic Thermal Management
- ▶ Weatherproof Deutsch Connector
- ▶ Polycarbonate Lens
- ▶ Patent Pending

## Xmitter Polycarbonate Covers

Polycarbonate covers help protect against rocks & oncoming debris as well as increased visibility in fog. With easy snap on installation.

PCV-P12BL Shown

PCV-P12Y Shown

Features

- ▶ Shatterproof Polycarbonate Protects from Rock Debris Impact
- ▶ Black for Street Legal Use Where Applicable
- ▶ Yellow Covers to Penetrate Fog

## Technical Information

| PART#    | Beam Pattern | Raw Lumens    | Dimensions          | Amp Draw | Wattage  |
|----------|--------------|---------------|---------------------|----------|----------|
| XPR-H9S  | Tilted       | 9,711 lm(ea)  | 500/80.01/81.02 mm  | 7.5A     | 90 Watt  |
| XPR-H12S | Tilted       | 12,948 lm(ea) | 609.6/69/76.25 mm   | 10A      | 120 Watt |
| XPR-H15S | Tilted       | 16,185 lm(ea) | 746.76/69/76.25 mm  | 12.5A    | 150 Watt |
| XPR-H18S | Tilted       | 19,422 lm(ea) | 881,38/69/76.25 mm  | 15A      | 180 Watt |
| XPR-H21S | Tilted       | 22,659 lm(ea) | 1016/69/76.25 mm    | 17.5A    | 210 Watt |
| XPR-H24S | Tilted       | 25,896 lm(ea) | 1150/69/76.25 mm    | 20A      | 240 Watt |
| XPR-H27S | Tilted       | 29,133 lm(ea) | 1285.24/69/76.25 mm | 22.5A    | 270 Watt |

## 360° Tube Frame Mount System

### TUBE MOUNTS

Machined Billet Clamps fit all Xmitter Series Light for tubed frame or chassis mounting.

XIL-B175 (45mm) Shown  
Features

- ▶ Machined Billet 6061 Aluminum
- ▶ Includes All Mounting Hardware
- ▶ Laser Engraved Vision X Logo
- ▶ Sold in Pairs
- ▶ Diameter: 19mm - 25mm - 32mm - 38mm - 43mm - 45mm - 51mm
